Best Sellers Rank: #68 in Books > Audible Audiobooks > Arts & Entertainment > Games #114 in Books > Humor & Entertainment > Puzzles & Games > Poker #115 in Books > Humor & Entertainment > Puzzles & Games > Gambling

Customer Reviews

I'm an avid poker player and I do my best to read a lot of the poker books when they hit the market, so I thought I'd give this one a try and I'm said to say that this is a horrible attempt at writing a poker book. In fact, it feels like a quick money scam to be honest. The author makes some bold statements, such as saying this book will help you crush your competition and pile up the money • that the book just doesn't deliver on. While math is important in poker, it's a small piece to the entire pie to being a successful poker player. Moreover, I have seen some keen e-marketing tactics the author has implemented to boost his sales. As of this review the book has 14 five and four star reviews in just 14 days of its launching; this is skeptical to say the least. Now, onto the book and its failings: First, it is littered with grammatical and punctuation errors throughout the

entire book. Unfortunately for us (the paying consumers) the author did not take the time to proof read and edit his book. Second, the author states in his book that he is by no means a poker expert. He states he wrote this book trying to find a way to beat his friends! Third, it is littered with poker strategy and mathematics mistakes and missing lots of key poker math concepts. The author makes a lot of glaring poker mistakes, both with basic poker strategy and poker math. Here are some that stood out to me: 1) The author calls an *ante* • the minimum amount you are willing to risk to play a game and *blinds* • chips placed on the table representing wagered money, which are incorrect and incomplete statements that will confuse beginners. 2) The author is trying to explain counting pot sizes. He states the game is a NLHE 9-handed \$100/\$200 blinds table with a \$25 ante.
