Customer Reviews

I should have read description of book thoroughly... More of an advertisement for their franchise/program than an actual "how to"Which it does effectively, however my need was for a "business credit how to blue print"

The information in this book is good, however it reads like a script, seems like the author had someone type up a phone conversation. There was a couple of sections that were just repeated. It doesn't seem like it was edited. I feel it is very incomplete

Dont buy this book. The whole book is in a interview format. With a person talking to a student. Hard read and not alot of valuable info. Was looking for a reference book but basically someone has taken the minutes from a class and put it in book form. Read about 25% of it before I got tired of the student going "wow" and "ok" after every statement.

I loved this book. Mr. Clayborne has really answered a lot of questions regarding Credit Repair and Starting a Credit Repair business. A very easy read. He made it very simple, interesting and it piqued my interest so much more, that I purchased his other book, "Hidden Credit Repair Secrets". On my way to a new and bright future.

Mark has done it again!! This book should be the FIRST book you read if you're considering a credit repair business. It was straightforward with information on ALL aspects of starting and running a thriving business, It was an easy read and he gave practical examples from his own hands own experience. He covered absolutely everything!! I promise you won't be disappointed!
