I started with "speak English like American". I studied and felt a lot of fun, together with my daughter, who came to USA when she was a few months old. So the readers need not have to be ESL students. It is a great book that I recommend to any of my friends. This book, does not have a simple story that is so fun (Amy's books and stories have been in our daily life between my daughter and I!) However, it is also very useful. I like the cartoons that help me to understand and memorize the phrases. I also like the part of "origin" and hope she adds this for each word/phrase/idiom in her books. Some words belong to different classes. I hope Amy can also mark it in the future. Of course, even for same class, people use different words based on different background as well as where they were born, where they grew up. some use those words a lot. It sounds like they just talk exactly what Amy has shown us! As a Chinese, there are so many

differences between my native language and American English. However, I try to find something mutual. I do find some. See, "Look at something from a different angle", "get something off my chest", "think out side of the box". When I finally found a similar Chinese word/phrase to match these words, I feel excited at it. I am looking forward to seeing more of her books. And thanks for , such a great place, so that I can know her new book comes out. I ask our local library to buy the new book and I can first read it. Such a great experience.

There are not that many books like this that help you understand and teach you how to use idioms properly. I've learned many useful expressions that I now use on a daily basis. It's fun!! I feel more confident when I started using new expressions. I recommend this book to anyone who wants to master the great modern English language.

Great, one of the book read I just year, I have learnt and applied it. I suggest reading this when You have a chance

While many of my students really enjoyed "speak business english like an american" This is book is a lot more realistic and the exercises a little more challenging. Also, the voices on the audio are closer to natural native speaker speed. Thumbs up.
