The City Of Tomorrow: Sensors, Networks, Hackers, And The Future Of Urban Life

Synopsis

Since cities emerged 10,000 years ago, they have become one of the most impressive artifacts of humanity. But their evolution has been anything but linear - cities have gone through moments of radical change, turning points that redefine their very essence. In this book a renowned architect and urban planner who studies the intersection of cities and technology argues that we are in such a moment. The authors explain some of the forces behind urban change and offer new visions of the many possibilities for tomorrow's city. Pervasive digital systems that layer our cities are transforming urban life. The authors provide a front-row seat to this change. Their work at the MIT Senseable City Laboratory allows experimentation and implementation of a variety of urban initiatives and concepts, from assistive condition-monitoring bicycles to trash with embedded tracking sensors, from mobility to energy, from participation to production. They call for a new approach to envisioning cities: futurecraft, a symbiotic development of urban ideas by designers and the public. With such participation we can collectively imagine, examine, choose, and shape the most desirable future of our cities. Cover design - a visualization of air quality in Copenhagen, using data collected by an array of bicycle-mounted environmental sensors. Image by Xiaoji Chen, courtesy of the Senseable City Lab. Design by Omnivore.

Book Information

Audible Audio Edition

Listening Length: 3 hours and 9 minutes

Program Type: Audiobook

Version: Unabridged

Publisher: Audible Studios

Audible.com Release Date: June 28, 2016

Language: English

ASIN: B01HH1780Y

Best Sellers Rank: #52 in Books > Audible Audiobooks > Arts & Entertainment > Architecture

#1455 in Books > Politics & Social Sciences > Politics & Government > Public Affairs & Policy >

City Planning & Urban Development #1484 in Books > Politics & Social Sciences > Social

Sciences > Urban Planning & Development

Customer Reviews

A little bit messy, a succession of inquiries into specific technologies without any clear insight on how they are going to change the way we live.

exactly what i need
