Three Cups Of Tea: One Man's Mission To Fight Terrorism And Build Nations

Synopsis

In 1993, following a failed attempt to ascend K2, Greg Mortenson was inspired by a chance encounter with impoverished mountain villagers in Pakistan and promised to build them a school. From that rash, earnest promise grew one of the most incredible humanitarian campaigns of our time—Mortenson's one-man mission to counteract extremism by building schools, especially for girls, throughout the breeding ground of the Taliban. Award-winning journalist David Oliver Relin has collaborated on this spellbinding account of Mortenson's incredible accomplishments in a region where Americans are often feared and hated. Over the following decade Mortenson built not just one but fifty-five schools. *Three Cups of Tea* is at once an unforgettable adventure and the inspiring story of how one man really is changing the world—one school at a time. Customer Reviews

I read this book just a few weeks before the scandal broke. I loved the story and am glad to see children being educated. And yet some things just didn't add up....International development is a challenge, and there is a long history of failure. The main problem is, how do you translate donor money into resources that get to the right people at the right time in the right form? It always seems like 90% is either wasted directly (mismanagement, bribes, etc.), or gets siphoned off to pay for

things that aren't used or not wanted. A lot of this is political: local leaders resist being upstaged and have their own priorities and face-saving motives, while the philanthropists insist upon doing it "our way" because "we know what's best". Three Cups of Tea makes it sound like Greg Mortenson has single-handedly solved these problems. Hence the questions that arose when I read the book. Could it really be that a village would be completely unanimous in support of new school, and with such universal, thumping excitement? There weren't any political toes being stepped on? Was there really no suspiciousness or even apathy among the villagers? Would a villager really approach Mortenson to have a broken bone set (Mortenson is a nurse), when this sort of 'technology-free medicine' is exactly the sort of thing, like midwifery, that less developed cultures maintain quite a good grasp of? Given how hard it is to get a doctor to work in rural but accessible areas in N. America, how could teachers be recruited to work in these new schools in tiny villages, which take days to get to and where the local language is different? How could he know the schools were being built in the right place?

I picked this book up at a 3 for 2 sale ages ago and it had been getting buried deeper and deeper in my to be read stack ever since. When I heard about the controversy surrounding the book, I decided it was time to pry it out and dust it off. Although I did not see the "Sixty Minutes" episode, I did read Krakauer's "Three Cups of Deceit". But then it occurred to me that I don't know any more about Krakauer than I do about Mortenson, and nor do I have any more reason to trust him. So I also read Mortenson's statement along with various material from his supporters, and I tried very hard to read the book with an open mind. Even with this effort, however, I have to say, no offense, but people actually believed this to begin with? I know I'm working with the benefit of hindsight and all, but the book is so fantastical I can't believe anyone ever swallowed it whole without gagging. We may never know how much, if any, of what David Oliver Relin tells us about Greg Mortenson is true, but if even half of it is, we all need to throw ourselves on our faces and repent - Greg Mortenson is the Second Coming of Christ. This book is myth-making in the finest tradition. Greg Mortenson is a hero of epic proportions. He's the most competent Army medic and trauma nurse. He's a skilled climber who selflessly spends 96 hours shuttling supplies up a mountain so that others can rest before attempting the summit and then, with only two hours' rest, he spends another 72 hours rescuing a severely ill climbing companion, and it is only with Mortenson's knowledge and skill that the man survives.

Written for kids 8 and up, this young reader's edition of Three Cups of Tea tells the inspirational

story of Greg Mortenson and his selfless mission to build schools in Pakistan and Afghanistan. Mortenson's original book, *Three Cups of Tea*, has become a worldwide bestseller. Since the goal is about building schools and educating kids, this book and the newly published picture book *Listen to the Wind* are naturals. When mountaineer Mortenson got lost in the Pakistani mountains after a failed attempt at climbing K2, he was rescued by the villagers in impoverished Korphe. As he was nursed back to health, Mortenson was shocked to learn that Korphe's children had no school, with lessons taught outdoors just three days a week. Kids learned to write using sticks in the dirt. To repay the village's kindness, Mortenson promised to return, and help build a school. Mortenson did come back to Korphe, and has indeed helped build not just one but fifty-five schools -- many for girls -- in both Pakistan and Afghanistan. The idea of "three cups of tea" comes from Korphe's village chief, Haji Ali. "With the first cup of tea you are a stranger, with the second you become a friend, and with the third, you join our family." Many parts of Mortenson's story are thrilling as he describes his adventures in such a dangerous part of the world.
