Customer Reviews

I work on the phone all day long. 90% of my job is cold calling and trying to open new accounts.

This book helped me understand my own numbers better so that I know how many people I need to qualify in order to get an account open. It also showed me how a simple question can change the whole dynamic of a phone conversation. Last week I cold called a firm and the decision maker was not super excited by the end of our conversation but she at least agreed to accept some literature from me in the mail. This week I called her back to follow up after reading the chapter on asking the right questions that will spark a response from the prospect and get an actual conversation started. I asked her how long she had been using her current provider and if she has ever compared against another firm to see if she is getting the best value for her money. I found out that she has been using her current provider since the winter and has never taken a look at another option since switching to them. I also found out the reasons she chose to use her current provider which gave me a very clear understanding of what I need to do in order to earn her business. We compared services and she was very surprised to find out that we can save her a significant amount of money and also speed up her process as well. By the end of the conversation she was calling me by my first name and the account should open sometime within the next two weeks. All I can say is that this is a great book and I can't wait to read it a second time. Just make sure that you put his recommendations to use. Update: I've continued to use the advice in this book and I can sincerely tell you that the quality of my calls have CLEARLY increased.
